Nature to the Rescue!

How Can Aloe Vera Plus Garlic & Kelp Help You?

Aloe Vera’s effect on the immune system starts with the digestive system. If the digestive system is not working properly, then the body’s immune system becomes overwhelmed due to waste build up, allowing bacteria and viruses to become more prevalent, causing inflammation to set in, joints to become affected, and the circulatory system to be compromised.

Feeding Aloe Vera may help prevent some of the problems associated with these kinds of issues; in turn, helping the body heal itself.

Garlic is traditionally used for worm and other parasites and has the ability to deter biting flies. Rich in sulfur, once ingested, garlic will cleanse the blood and then be excreted through the pores of the skin where sulfur compounds are mildly noxious to parasites. Garlic is also ideal for respiratory disorders due to its expectorant qualities and is one of the best herbs to prevent and fight infections.

Benefits of Aloe Vera:

- Helps treat ulcer disease - normalizing acid levels in the stomach.
- Forms a lining throughout the colon to keep toxic waste from entering the body.
- Strengthens the immune system - Forms a barrier against microbial invasion (viruses).
- Facilitates the absorption of water, electrolytes and nutrition in the digestive system.
- Provides the raw material critical for lubrication of the joints.
- Also has natural healing and detoxifying powers and works gently with the digestive tract to help break down impacted food.
- Helps sore and stressed muscles recover faster in working horses.

Benefits of Garlic:

- Insect repelling qualities.
- Natural MSM.
- Natural antioxidant.
- Antibacterial, helps fight infection.
- Antiviral, antifungal and anti-parasitic.
- Helps build a healthy immune system.
- Inhibits the growth of cancer cells.
- Aids in circulation and digestion by relieving inflammation of intestines.

Benefits of Cumin:

- Cumin aids in diarrhea, gas colic and bloat.
- Stimulates appetite.
