

PRO BI™ for Pets

Microbial Benefits

PRO BI™ for Pets is a biological feed additive designed to maximize digestive efficiency. An animal's beneficial intestinal bacteria can be destroyed or depleted and the pH of their environment can be altered during times of stress. Competition, travel, breeding, treatment with antibiotics, de-wormers, and other medications can cause this stress. Stress can also be created by alterations of weather, environment, feed, and water.

INGREDIENTS: Water, Liquid Lactobacillus Acidophilus Fermentation Product, Organic Yucca Schidigera Extract, Organic Aloe Vera Gel Concentrate, Lactic Acid, Organic Coconut Oil, Organic Barley Hulls, Salt, Yeast Culture, Organic Ginger, Organic Peppermint, Organic Sweet Orange Peel, Organic Dandelion, Organic Violet Leaves, Organic Gentian Root.

In Antibiosis studies, **PRO BI™** exhibited a retardation of the normal development cycle of these pathogenic organisms.

PRO BI™ for Pets

Research has proven that there are two basic types of microorganisms. The majority are beneficial or good bacteria, and the others are pathogenic or bad bacteria. **THE KEY IS BALANCE** of good and bad bacteria. When proper balance is maintained, an animal is healthy, grows at a good rate and converts feedstuffs efficiently. Animals become ill when balance is upset due to stress or other factors. Feed conversion and animal health can decline.

Knowing this balance is important, companies started providing direct-fed microbial (pure cultures). The purpose was to give high levels of healthy or good bacteria to prevent the bad bacteria from taking over the system. This has led to a numbers contest where producers buy high concentrations of good bacteria. Lactobacillus Acidophilus is one of the most common. When we examine how these microorganisms function, we find some interesting points. Lactobacillus Acidophilus does not attack bad bacteria. It is a Probiotic that competes for space. Once established, it develops a zone around itself where pathogenic (bad bacteria) do not grow. This area is called the “zone of inhibition,” and it prevents the growth and development of pathogens. **PRO BI™ for Pets** provides these properties, which is why **PRO BI™ for Pets** functions without live organisms.

PRO BI™ for Pets, in final form, is not a source of live organisms. However, it does supply the by-products they produce. The active ingredients in **PRO BI™ for Pets** retard the growth of 22 pathogenic organisms. **PRO BI™ for Pets** provides the benefits obtained from live cultures without the problems and concerns of using pure cultures.

The Digestive Tract First-Aid Kit

NEVER BE WITHOUT IT!

How to Use **PRO BI™ for Pets**:

Dogs: 20 drops per 20 pounds of body weight, 2 times per day.

Cats: 10 drops per 10 pounds of body weight, 2 times per day.

Can be syringed or top-dressed with food.

(20 drops = 1 cc or ml; 1 oz = 30 ml)

Call 1-800-373-5971 for complete instructions on administration for all pets.

Allow 60-90 minutes after any medication before administering **PRO BI™ for Pets**.

PRO BI™ for Pets

Customer Feedback

“Hi Everybody,

Just wanted to thank you for this amazing product. My sister in law turned me on to your **PRO BI** for helping with the microflora in my dog's gut! So in other words, my 6 ½ year old male pit bull was diagnosed with allergies to grass and pollen last year, and we spent well over \$1800 on allergy shots and antibiotics, first one and then the other about every 6 weeks (which never worked for him at all). He seemed to just keep getting sicker and sicker, but the vet didn't seem to have any answers... Hmmm it's a practice of medicine! One size does not fit all!!! What works for 1 pet does not work in every case! I was so scared with spring right around the corner and worried about my baby this year. What would we do to help his situation and allergies this season???

I was at a loss and then spoke to my sister in law Vicky, and she ordered me a bottle and said to try this product...**PRO BI**. I started giving it to my dog 1x a week, about 1 ml, just to get his system used to it and then started to give him 1 ml everyday starting in May 2019. I am 100% so happy so far this season. No Allergy Shots No Antibiotics. I'm yelling that from the roof tops...No Allergy Shots & No Antibiotics for my baby! He is healthy and happy, and his body is fighting his allergies on his own from inside his GUT, due to your amazing product.

I wish everyone who has a pit-bull knew about this product! They are the most sensitive breed I've ever had the pleasure to be around. If I have anything to say about it, more and more people will know how amazing your product is. I tell everyone and mention it to everyone who posts on Facebook as well. Anything I can do to help another person help their babies not have to go through what my sweet boy went through last year, and he will never have to be that sick again.

Please spread the word, if you read this pass along the lesson I've learned...Thank you from the bottom of my Heart. - Brandy

P.S....**PRO BI** will be a staple in Baloo's diet for the rest of his life - all year long... Not just in allergy season.”

These pics show the redness and allergy sores on my baby, Baloo. He also had them all over his back, stomach, and chest, besides losing hair where the sores were. This product changed our world!! (Oh, and in case anyone was concerned, we did have him fixed due to some bleeding from his boy parts and we were scared about him getting cancer).

PRO BI™ for Pets

Customer Feedback

“Our dog had been bitten or stunk by something - we tried everything! I called Jim for advice – He recommended putting **PRO BI** on it – I started right away – the first day I took a towel and padded the **PRO BI** on the sores three or four times. Within 24 hours, it started looking better! We were shocked! I purchased a small spray bottle and continued 2 or 3 times a day just spraying the **PRO BI** on the wound – It was amazing how well it worked!”
