DIRECTIONS:

Feed at the rate equal to 3.0% of the live weight of the fish.
 Fish may be fed once or twice per day well after sunrise and before dusk.

Fish should consume all feed in less than 30 minutes. Fish will usually consume more when the water temperature is 70 to 85 degrees Fahrenheit.

Spot Feed in the same location at the same time each day.

CAUTION: Do not feed more than 30 pounds of feed per acre per day.

Store in a cool, dry place.
