

Customer Feedback for Dy's Liquid Bandage

“Meet Cheese (LG Azippos Wild Ace). He is a 7 month old registered paint colt. On Oct 25th, Cheese was playing with a bucket hook and hooked his right nostril on it. If you look closely at the picture to the far right, it is hanging.

He ripped it from the inside out so the vet had to actually cut the skin more in order to sew the nostril back up to where it is suppose to be. The end result was what you see in the picture on the left.

Our vet, Dr. Hall of Kirkwood Vet, did an awesome job of reconstructing Cheese's nostril the best it could be done as he did lose some tissue. The next photo was taken approximately 1.5 weeks after the incident, and this is when I told my husband the next time he delivered to ABC in Osco to pick up this amazing ointment called **Dy's Liquid Bandage**. I told him how it worked wonders for my Arabian gelding's foot. He was unsure at first at how something could work that great but he said he would get some.

Another driver went to ABC instead of my husband so he picked it up for us and so began the recovery, immediately! I put **Dy's Liquid Bandage** on the first night heavily and the next week I put it on as needed. Within 2 days the healing was noticeable. The last picture was taken 2 weeks ago.

Dy's Liquid Bandage is amazing, as we never thought Cheese's nose would heal to what it looks like today, but thanks to the great people of ABC and their research, he healed quickly. His hair has grown back, and it will always look different just because he is missing tissue there, but what should have taken months to recover has only taken a month and it looks great.”

- Marcus & Jennifer Richardson

“I use and love **Dy's Liquid Bandage**. Its ability to quickly heal a wound in humans and animals is amazing! Plus being all natural I'm not afraid to handle it! I always have it in my medicine cabinet!”

- Stephanie
